## A cut above...

Our moulded handle scissors make cutting a snap. The handles are moulded directly onto the stainless steel blades so they are permanently bonded together and are shaped to be comfortably used in both the left and right hand.

The hot forged scissors (overleaf) are made by craftsmen in the traditional way: Precision forged, accurately ground, hand assembled and guaranteed to cut from pinch to point.

The new Soft Grip scissor features extra comfortable handles plus built-in screwdriver / priser and bottle opener. It also disassembles for easy cleaning.

The blades on all models are tested twice before being allowed to leave the factory.
