PELICAN
RATCHET
CAN OPENER 1500

SOFT GREY

BLACK

BLUE

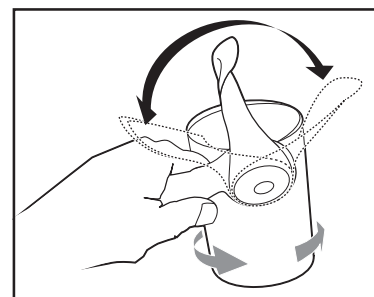

Aesthetics and ergonomics in equal measure.

A revolutionary new can opening device which, as well as having a uniquely distinctive look, actually makes the task of opening cans so much easier than a "normal" can opener.

Pelican uses a power-multiplying ratchet action which requires less effort, making opening cans easier on your hands.

Everyone will feel the benefits of this anti-fatigue design, especially those with arthritic hands or an impaired grip.

Suitable for left or right-handed use, Pelican also saves cut fingers by acting as a handle to pour the can's contents and then releases the empty can straight into the waste bin - all without the need to ever touch the can.
